

# PREVALENCE REDUCTION INNOVATION FORUM

*Improving the Science of Human Trafficking  
Prevalence Research Across the World*

**UNIVERSITY OF GEORGIA  
MAY 22-24, 2023**

# WELCOME

The Center on Human Trafficking Research & Outreach (CenHTRO) and the U.S. Department of State Office to Monitor and Combat Trafficking in Persons are honored to host the Prevalence Reduction Innovation Forum (PRIF) at the University of Georgia (UGA) campus on May 22-24.

For the past three years, PRIF has supported a global community of researchers eager to expand the existing science of human trafficking prevalence estimation. PRIF asked its participants to address challenges in surveying the hard-to-reach populations of human trafficking victims and survivors. Working in six countries across the world, teams tested multiple estimation methodologies among specific demographics in targeted geographic areas. They built the capacity of local research teams by collaborating on research design, testing, and dissemination. Together, we have learned how to increase our collective anti-human trafficking impact through more accurate data.

Over the next three days, PRIF researchers will review the results of their trials, finalize indicators and definitions employed in the research, and discuss how this knowledge can improve outcomes for victims and survivors of human trafficking. Additionally, the conference debuts an innovative meta-analysis, which uses simulation to compare the accuracy and cost-effectiveness of various methodologies in different geographic contexts and industries. We look forward to the valuable insights that will be shared as the conference unfolds.

We extend a warm welcome to our distinguished guests from national and international organizations, and especially to our research teams from PRIF research sites who have traveled great distances to participate in the conference.

# PRESENTATIONS

## New York University

### Estimating the Prevalence of Forced Labor in the Fishing Industry in Costa Rica

Meredith Dank and Alina Cedeño

The team from New York University employed (1) multi-stage Probability Proportional to Size (PPS) or household enrollment sampling, and (2) multi-wave snowball or Link Tracing Sampling (LTS) to examine the prevalence of forced labor in Costa Rica's fishing sector. A Network Scale-Up Method (NSUM) component was added to the PPS survey. The project included collaborations with the University of Massachusetts Lowell and a local team from the International Organization for Migration.

Meredith Dank

### Estimating the Prevalence of Forced Labor Among Tanzanian Migrant Domestic Workers

Meredith Dank and Furaha Dimitrios  
Caloupis

The team from New York University evaluated two sampling strategies: (1) multistage PPS (later revised to a stratified simple random sampling (STSRS) design), and (2) LTS to estimate the prevalence of domestic servitude among women who worked abroad and returned to Tanzania. NSUM was included in the PPS/STSRS design. The study focused on returned domestic workers in Dar es Salaam and Zanzibar. Collaborators included the University of Massachusetts Lowell, the University of Alaska Anchorage, and a local team from the Community Health and Social Welfare Africa.

## **The Freedom Fund**

### **Estimating the Prevalence of Commercial Sexual Exploitation of Children in Brazil**

Carl Kendall, Ana Maria de Brito, Yuki Lo, and Ligia Kerr

Directed by the Freedom Fund and implemented by the Oswaldo Cruz Foundation and the Federal University of Ceará in Brazil, this study estimated the size of the population of female children and adolescents less than 18 years of age involved in the commercial sexual exploitation of children (CSEC) in the Recife Metropolitan Area (RMA) in Brazil. The study used 1) the Successive Sampling Population Size Estimation (SS-PSE) method via Respondent-Driven Sampling (RDS) among young women sex workers between 18 to 21 years of age, who began exchanging sex for money, favors, or goods or were otherwise commercially sexually exploited at least once before their 18th birthday, and 2) NSUM with a random sample of RMA residents contacted by phone.

Carl Kendall

Ana Maria de Brito

## **NORC at the University of Chicago**

### **Estimating the Prevalence of Forced Labor Among Domestic Workers in Morocco**

Kareem Kysia, Sheldon Zhang, Ridhi Sahai, and Kyle Vincent

NORC at the University of Chicago explored the prevalence of domestic servitude in the Anfa and Maarif regions of Casablanca, Morocco, using two strategies: (1) Mark-Recapture experimentation (MR) and (2) LTS. In addition, NORC fielded a randomized controlled trial embedded in the LTS component to understand if there are differences in prevalence estimates when using cell phone-based versus in-person interviewing techniques. NORC implemented the study in collaboration with local data collection partner, Claire Vision Consulting, local research coordinator, Mr. Ragbi Aziz, and the University of Massachusetts Lowell.

Kareem Kysia

**University of Massachusetts Lowell**  
**Estimating the Prevalence of Forced Labor**  
**Among Domestic Workers in Tunisia**

Sheldon Zhang, Jason Rydberg, and Hassen Bououni

The team from the University of Massachusetts Lowell utilized two estimation methods to estimate the prevalence of domestic servitude in Tunis, Tunisia: (1) Time-Location Sampling (TLS), and (2) MR sampling. An NSUM component was added to the TLS study. Collaborators included New York University and a local team from ELKA Consulting.

Sheldon Zhang

**Estimating the Prevalence of Forced Labor**  
**in the Brick Kiln Industry in Pakistan**

Courtland Robinson, Andrea Wirtz, Syeda Mahnoor Rizvi, Zafar Fatmi, Asaad Nafees, Waqas Hameed, Sohail Lakhani, and S. Sajid Abbas Shah

Courtland Robinson

The team from Johns Hopkins University estimated the prevalence of forced labor in the brick kiln industry in Sindh province of Pakistan. In collaboration with Aga Khan University, the study utilized two sampling methodologies: (1) multi-stage, cluster random sampling with PPS, and (2) RDS. An NSUM component was included in the RDS survey. Additionally, community mapping was conducted in 22 districts in Sindh where brick kiln work was known to occur. The presentation also describes the impacts of the August/September 2022 floods on the brick kiln industry, on our study, and on the working and living conditions of brick-kiln workers in Pakistan, with a particular focus on impacts on forced labor.

### **Biases in the Measurement of Hidden Populations: A Meta-analysis of PRIF Studies**

Georgiy (Gosha) Syunyaev and Macartan Humphreys

WZB will present preliminary results from the meta-analysis of biases of various methods used to measure the prevalence of human trafficking based on the data from PRIF studies. First, we provide formal descriptions of the individual designs of the studies included in PRIF. We present a Bayesian model that pools individual study estimates of the prevalence and size of a target population to estimate the relative bias of various combinations of sampling and estimation strategies. We also introduce an [R] package, hiddenmeta, that implements the meta-analysis framework we developed so it can be extended to include other studies. The package provides tools for the diagnosis of various sampling and estimation strategies for future studies of the prevalence and size of hard-to-reach populations.

Macartan Humphreys

## **Stanford University**

### **From 'Gold Standard' Surveys to Administrative Data: Prevalence Measurement for Practical Applications and Policy**

Grant Miller, Kimberly Babiarz, and Luis F. De Assis

The Stanford Human Trafficking Data Lab will present work measuring trafficking indicators among the universe of detected cases of trafficking in Brazil over the past 20 years. We will highlight the unique utility of long-term indicator tracking as well as the limitations of using detected cases to measure prevalence over time. This work has policy implications for improved trafficking indicator measurement in regular, ongoing administrative data collection efforts in Brazil and beyond.

# SCHEDULE

Monday, May 22, 2023

7 a.m.	<b>BREAKFAST AND REGISTRATION</b>	Magnolia Ballroom
8:30 a.m.	<b>INTRODUCTORY REMARKS</b>	Masters Hall
	<b>David Okech</b> <i>Director, CenHTRO Professor of Social Work, UGA</i>	
	<b>Martin Kigel</b> <i>Associate Provost for Global Engagement, UGA</i>	
	<b>S. Jack Hu</b> <i>Senior Vice President for Academic Affairs and Provost, UGA</i>	
	<b>Lydia Aletraris</b> <i>Associate Director, CenHTRO Associate Research Scientist, UGA</i>	
	<b>Natasha Greenberg and Susan Snyder</b> <i>U.S. Department of State Office to Monitor and Combat Trafficking in Persons (TIP Office)</i>	
8:50 a.m.	<b>SESSION ONE</b>	Masters Hall
	University of Georgia: <i>Introduction from CenHTRO Director David Okech</i>	
	New York University: <i>Forced labor in the fishing industry in Costa Rica</i>	
	The Freedom Fund: <i>Commercial sexual exploitation of children in Brazil</i>	
	NORC at the University of Chicago: <i>Forced labor among domestic workers in Morocco</i>	
10:40 a.m.	<b>BREAK</b>	Pecan Tree Galleria
11 a.m.	<b>SESSION TWO</b>	Masters Hall
	New York University: <i>Forced labor among Tanzanian migrant domestic workers</i>	
	University of Massachusetts Lowell: <i>Forced labor among domestic workers in Tunisia</i>	
	Johns Hopkins University: <i>Forced labor in the brick kiln industry in Pakistan</i>	
12:30 p.m.	<b>LUNCH</b>	Magnolia Ballroom

1:30 p.m.	<b>SESSION THREE</b>	Masters Hall
	Reflection: <i>Design Implementation and Challenges in Field Activities</i>	
	Facilitators: Meredith Dank and Yuki Lo	
3 p.m.	<b>BREAK</b>	
3:15 p.m.	<b>SESSION FOUR</b>	Masters Hall
	Continued: <i>Design Implementation and Challenges in Field Activities</i>	
	Facilitators: Meredith Dank and Yuki Lo	
4:15 p.m.	<b>CLOSING REMARKS</b>	Masters Hall
	Facilitator: David Okech	

**DINNER – Monday, May 22, 2023 – 6 p.m.**

***State Botanical Garden of Georgia  
2450 S. Milledge Avenue, Athens, GA 30605***

- Shuttle departs hotel at 5:45 p.m.
- Remarks by Philip Hong, Dean, School of Social Work, UGA, at 6:15 p.m.
- Shuttle departs for hotel at 8 p.m.

**Tuesday, May 23, 2023**

7 a.m.	<b>BREAKFAST</b>	Magnolia Ballroom
8:30 a.m.	<b>SESSION FIVE</b>	Room R, 2nd Floor
	WZB Berlin Social Science Center: <i>Biases in the Measurement of Hidden Populations:</i> A Meta-Analysis of PRIF Studies	
10 a.m.	<b>BREAK</b>	Kellogg Concourse
10:15 a.m.	<b>SESSION SIX</b>	Room R
	Reflection: <i>Implications for Measurement and Estimation</i>	
	Facilitators: Katie McLaughlin and Ian Fellows	
11:30 a.m.	<b>SESSION SEVEN</b>	Room R
	Reflection: <i>Ethics of Conducting Research with Vulnerable Populations</i>	
	Facilitator: Courtland Robinson and Lisa G. Johnston	

12:45 p.m.	<b>LUNCH</b>	Magnolia Ballroom
1:45 p.m.	<b>SESSION EIGHT</b>	Room R
	Reflection: <i>PRIF Core Indicators –Findings and Next Steps</i>	
	Facilitators: Lydia Aletraris, Sheldon Zhang, and Kareem Kysia	
3:15 p.m.	<b>BREAK</b>	Kellogg Concourse
3:30 p.m.	<b>SESSION NINE</b>	Room R
	Continued: <i>PRIF Core Indicators – Findings and Next Steps</i>	
	Facilitators: Lydia Aletraris, Sheldon Zhang, and Kareem Kysia	
4:45 p.m.	<b>CLOSING REMARKS</b>	Room R
	Facilitator: Lydia Aletraris	

## Wednesday, May 24, 2023

7 a.m.	<b>BREAKFAST</b>	Magnolia Ballroom
8:15 a.m.	<b>SESSION TEN</b>	Room R
	Reflection: <i>Implications for Policy and Programming Implementation</i>	
	Facilitators: Casey Branchini Risko (contractor on behalf of the TIP Office), Grant Miller, and Kimberly Babiarz	
	Stanford University: <i>From 'Gold Standard' Surveys to Administrative Data: Prevalence Measurement for Practical Applications and Policy</i>	
9:45 a.m.	<b>BREAK</b>	Kellogg Concourse
10 a.m.	<b>SESSION ELEVEN</b>	Room R
	Final discussions and next steps	
	Facilitator: David Okech	
11:30 a.m.	<b>FINAL REMARKS + GRAB-AND-GO BOXED LUNCH</b>	Kellogg Concourse
	Facilitator: Lydia Aletraris	

# ACKNOWLEDGMENTS

The Prevalence Reduction Innovation Forum would not have been possible without the efforts of:

**David Okech** – *CenHTRO Director*

**Lydia Aletraris** – *CenHTRO Associate Director*

**Elke Yath** – *CenHTRO Associate Director of Business & Human Resources*

**André Gallant** – *Director of Communications*
